Managing Multitenant Architecture 12c

Duration

2.0 Days

Course Objectives

- Configure resource manager to share resources within a multitenant container database between containers and within a pluggable database.
- Implement unified auditing in a multitenant container database and its pluggable databases
- Use Oracle Data Pump, SQL*Loader in pluggable databases
- Monitor the multitenant container database and pluggable databases
- Describe the multitenant architecture
- Create a multitenant container database
- Create a pluggable database using different methods
- Plug a non-CDB into a multitenant container database
- Manage multitenant container databases and pluggable databases
- Administer multitenant container database and pluggable database storage structures
- Create and administer common and local user accounts
- Manage common and local privileges and roles
- Configure multitenant container databases and pluggable databases backup and recovery operations
- Manage the multitenant container database and pluggable databases performance
- Gain an understanding of the Oracle Database Cloud Service
