TK212: GSM Signalling

Duration

5.0 Days

Course Content

1. OSI Reference Model

2. Air Interface

- 2.1. The Structure of the Air Interface in GSM
- 2.2. Physical and Logical Channels
- 2.3. Logical Channel Configuration
- 2.4. Interleaving
- 2.5. Signaling on the Air Interface
- 2.6. LAPDm
  - 2.6.1. LAPDm Structure
  - 2.6.2. LAPDm Message Types
- 2.7. Air Interface Messages

3. Abis Interface

- 3.1. Channel Configuration
- 3.2. Signaling on Abis Interface
- 3.3. Dimensioning over Abis interface
- 3.4. LAPD
  - 3.4.1. LAPD Structure
  - 3.4.2. LAPD Message Types

3.5. Abis Interface Messages

4. A Interface

4.1. Signaling System Number 7

4.1.1. Message Transfer Part

4.1.2. Signaling Connection Control Part

4.1.3. User Parts: TCAP, MAP, BSSMAP…

4.1.4. SS7 Message types

4.1.5. Addressing and Routing

4.2. A Interface Signaling

4.3. Dimensioning over A interface

4.4. A Interface Messages
